

Microtech Instruments is pleased to announce the availability of several new products.

QS1-260-2100 THz Generator offers quasi-continuous coverage of 160-2100 GHz range of frequencies. This product is based on the popular OV-24 BWO combined with a set of four frequency multipliers.

The latest shipment of QS1-1100, QS1-1250 and QS1-1420 BWO's beat all records on output power of these generators, thanks to incremental improvements in the manufacturing process.

THz Image Acquisition Software boosts the performance of THz detectors. This LabView based software is compatible with DAU-3 data acquisition unit and standard mechanical scanners.

Please refer to our website for details.

About Microtech Instruments, Inc.

Microtech Instruments is a leading manufacturer of THz components and systems, including THz spectrometers, generators and detectors. Committed to innovation, Microtech collaborates with leading research organizations worldwide.
